

Cervical cytology

Automated cervical cytology

Clinical Application Module

Vision Cyto Pap

Automation of cervical cytology.

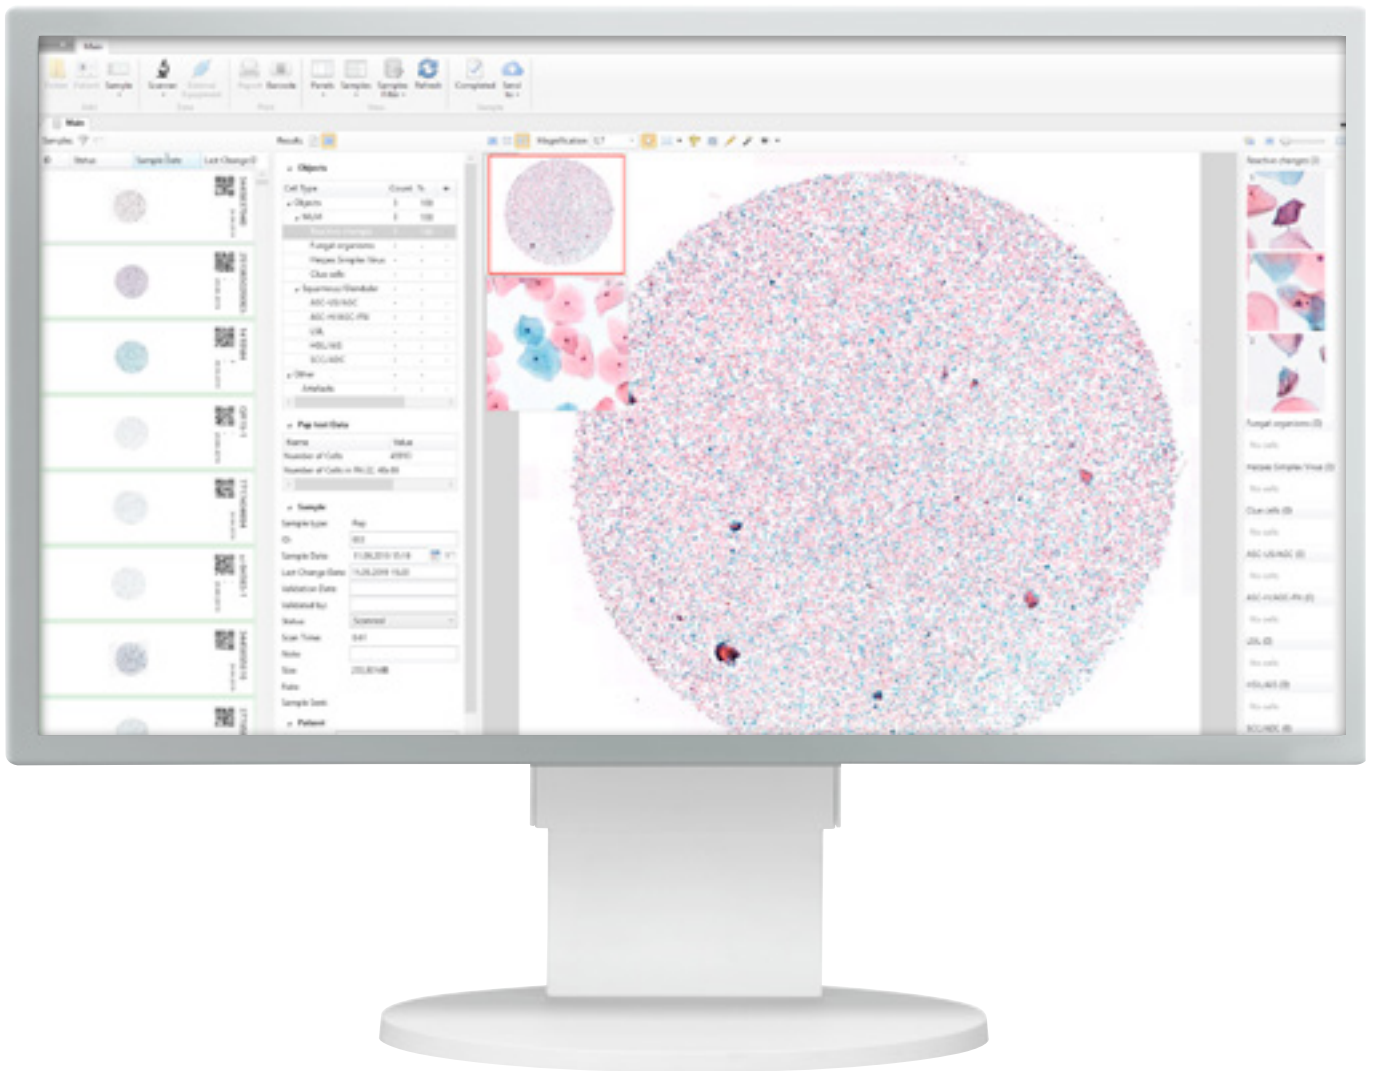

Automatic pre-classification by Bethesda system.

NILM
Reactive changes

Squamous / Glandular
— ASC-US / AGC
— ASC-H / AGC-FN
— LSIL
— HSIL / AIS
— SCC / ADC

- Creating digital sample and cells gallery
- Database for archive management
- Bi-directional communication with LIS
- Pre-set cell atlas

Digital slide

20x magnification

40x magnification

Additional Module

Vision Cyto Pap ICC

Additional examination for cervical cytology

- Assessment of p16/Ki protein expression
- Automatic identification and pre-classification of cells with cytoplasmic and nuclear expression: Low-positive, Positive

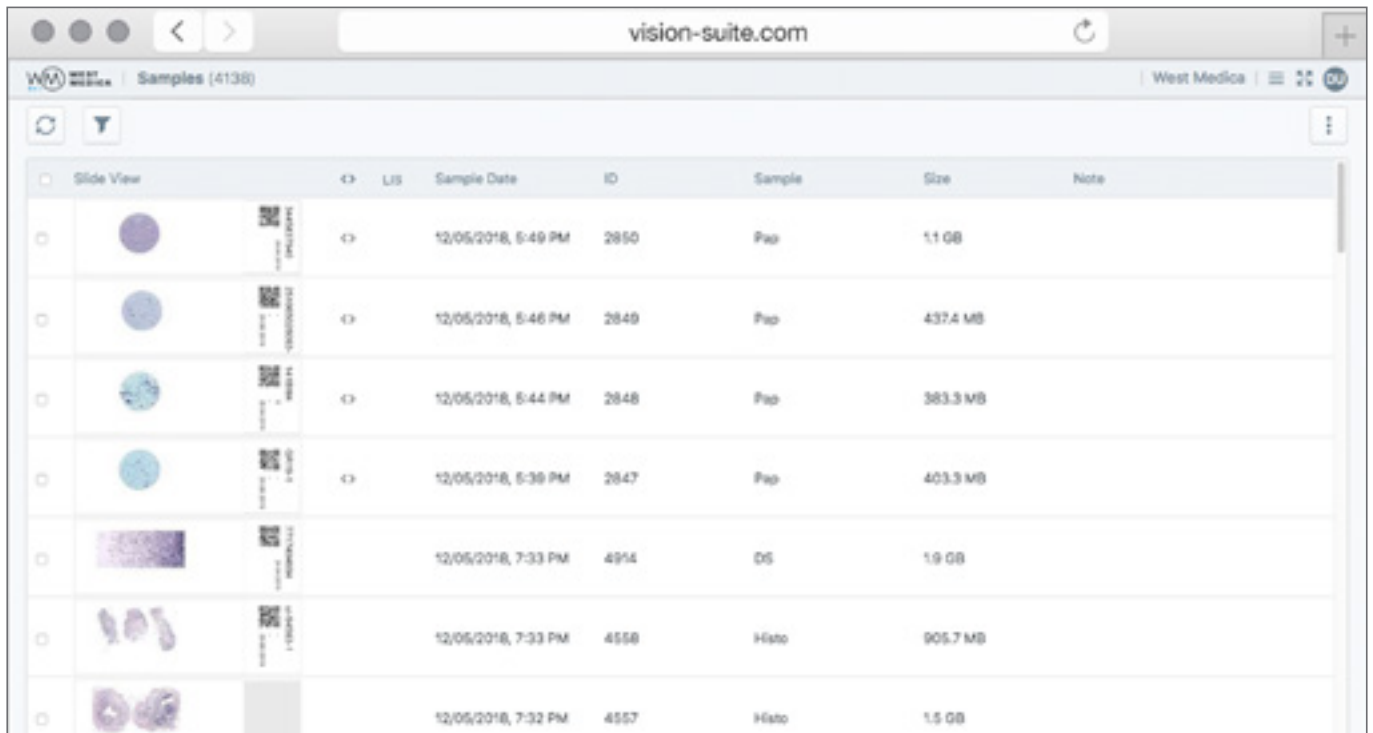

Artificial intelligence

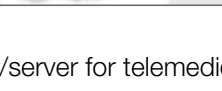

Artificial intelligence (AI) cumulates algorithms and technologies that allow computers to learn and solve intellectual tasks provided by humans.

AI speeds up processing and interpretation of data, and allows to efficiently perform the most comprehensive tasks, including medical image analysis.

Consulting and Education Module Vision Suite

The screenshot shows a web browser window with the URL 'vision-suite.com'. The page displays a list of samples under the heading 'Samples (4136)'. The table has the following columns: Slide View, LIS, Sample Date, ID, Sample, Size, and Note. The data rows are as follows:

Slide View	LIS	Sample Date	ID	Sample	Size	Note
		12/05/2018, 5:49 PM	2850	Pap	1.1 GB	
		12/05/2018, 5:46 PM	2849	Pap	437.4 MB	
		12/05/2018, 5:44 PM	2848	Pap	383.3 MB	
		12/05/2018, 5:38 PM	2847	Pap	403.3 MB	
		12/05/2018, 7:33 PM	4914	OS	1.9 GB	
		12/05/2018, 7:33 PM	4558	Histo	905.7 MB	
		12/05/2018, 7:32 PM	4557	Histo	1.5 GB	

Cloud/server for telemedicine and remote consultations with colleagues.

Clinical applications

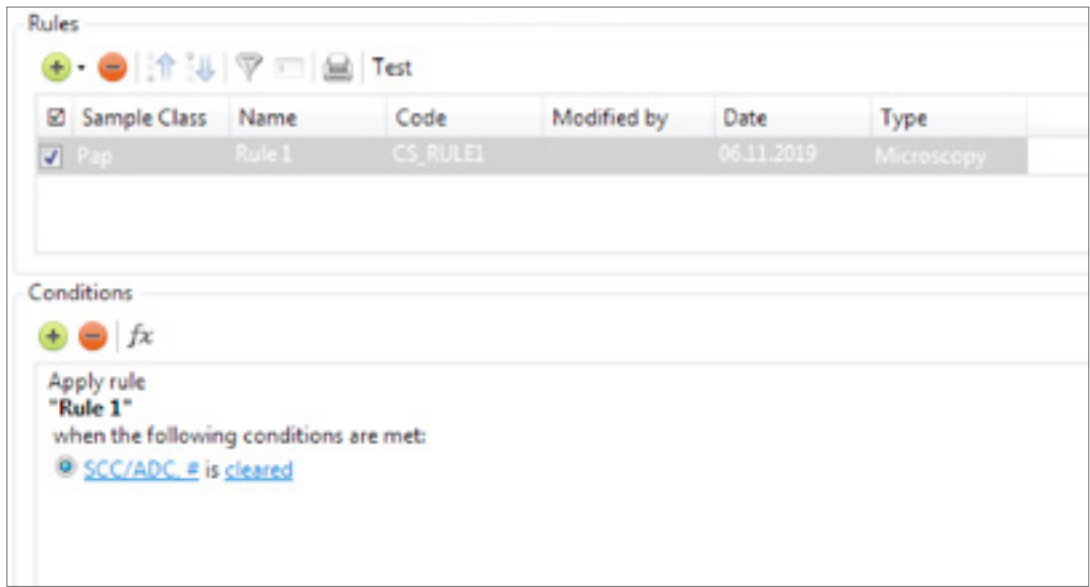

The latest developments of artificial intelligence provide a solution for the tasks connected with automation in digital microscopy.

Our technologies speed up the diagnostic process, reduce analysis time and lower subjectivity of the results received.

They improve the efficiency of laboratory routine operation, bringing microscopy analyses in line with state-of-the-art standards.

Administrative Modules

Vision Manager

Analysis procedure automation, data processing rules created by the specialist.

Vision Remote

Remote workstation.

Cervical cytology workflow

Sampling

**Molecular analysis
HPV testing**

**Automatic microscopy
Vision Cell Imaging Analyzer**

**Sample preparation using
cytology processor (LBC)**

Specifications

Vision Assist
Cell Imaging Analyzer

Vision Pro
Cell Imaging Analyzer

Vision Ultimate
Cell Imaging Analyzer

Please check the intended use and the registration in your local regulation. Depending on the regulations of the respective region, some products may be used for research purpose only.

Pre-classification has to be validated by the specialist reviewing the galleries of cells. We reserve the right to change specification without notice.
