in Digital Diagnostic Microscopy

Community of Professionals and Experts

(free subscription)

Training

Select your area of expertise (cytology, hematology, microbiology, histopathology) and take part in regular tests to access your skills. New tests are available every month.

Knowledge exchange

Make your comments and communicate with your colleagues. You can send interesting digital samples or glass slides to be uploaded and discussed with the community.

Ratings

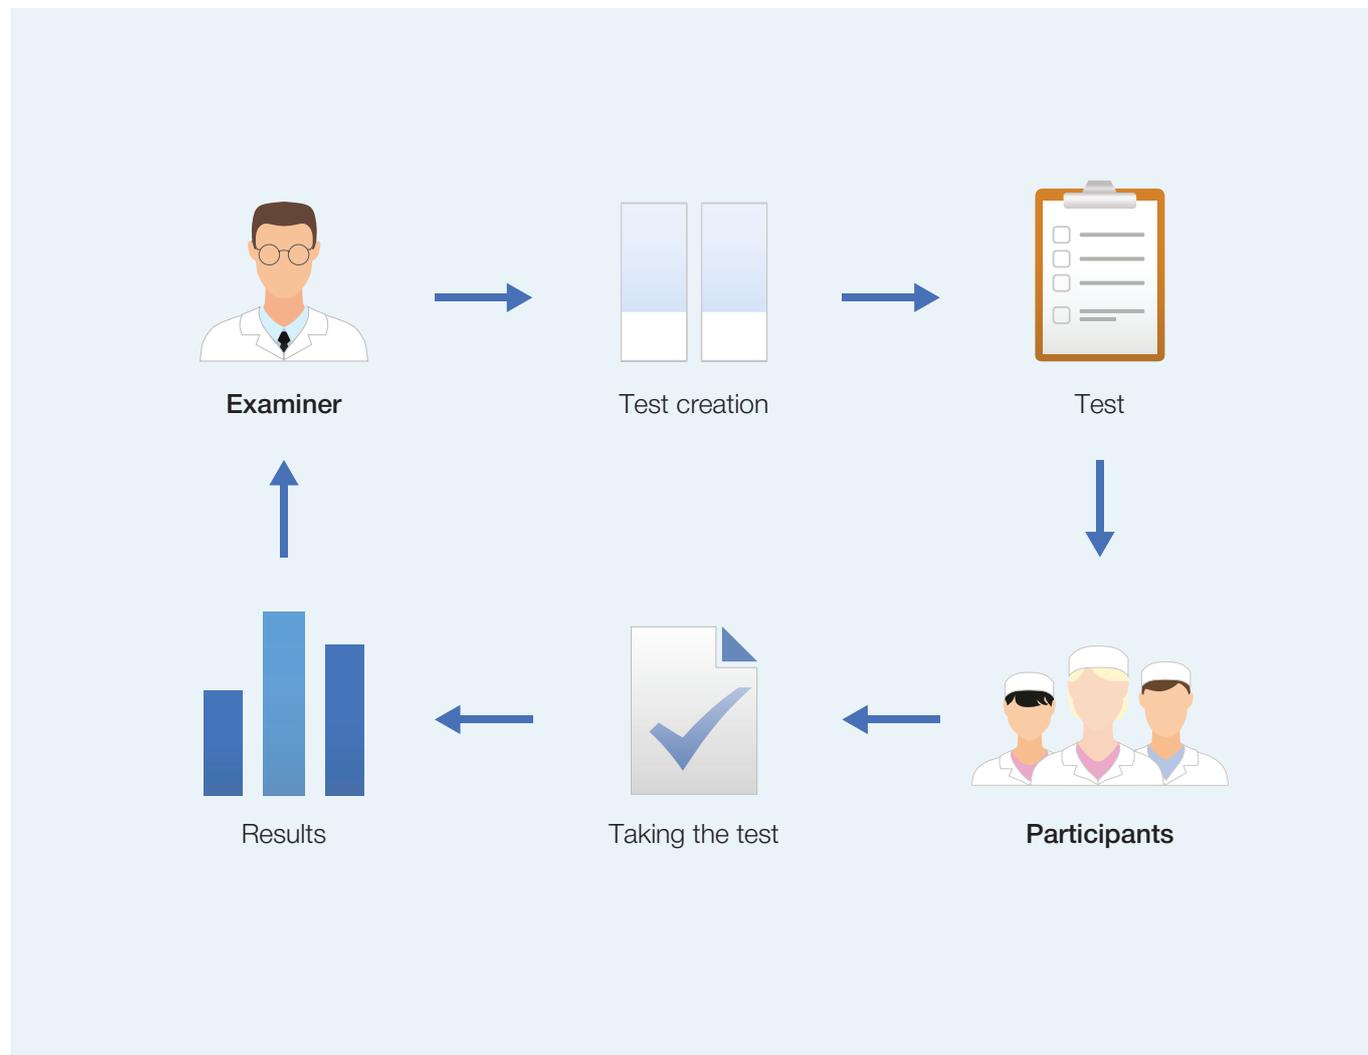

Track your level and improve your rankings. Get prizes and bonus training materials.

Digital microscopy

Challenging cases, high quality images.

Training and Testing the Skills of Specialists

(extended subscription)

Proficiency Evaluation

Online testing service for laboratories, laboratory quality control centers, advanced training institutes, educational institutions and universities.

Results

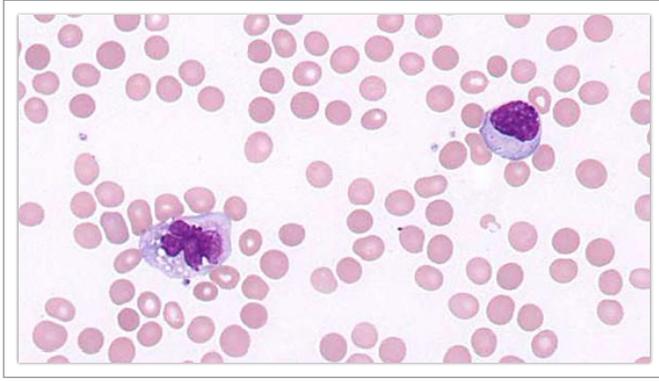

The information on test solutions is displayed in real time for each of the participants. On test completion, the examiner and the participant receive statistical reports for evaluation of the results.

Tests

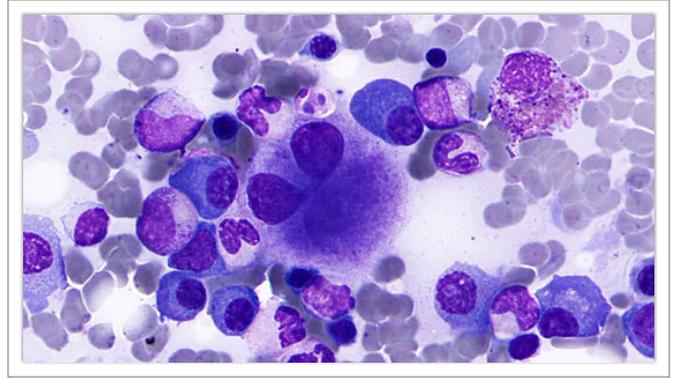

The examiner creates tests which include samples with digital slide and list of participants. Members automatically receive a notification about the new test by e-mail.

Technologies

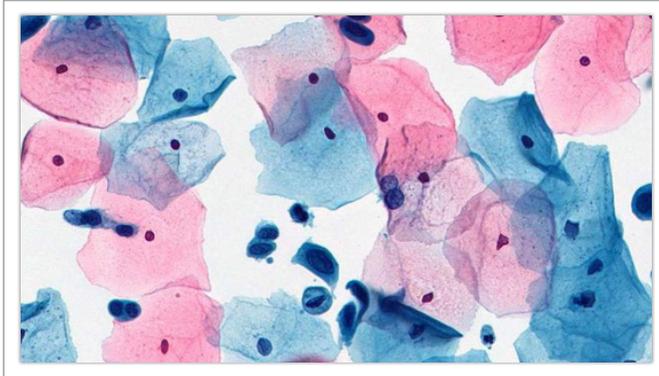

Only Internet access and a web browser are required for work. Supports PCs and tablets. Automatic e-mail notifications.

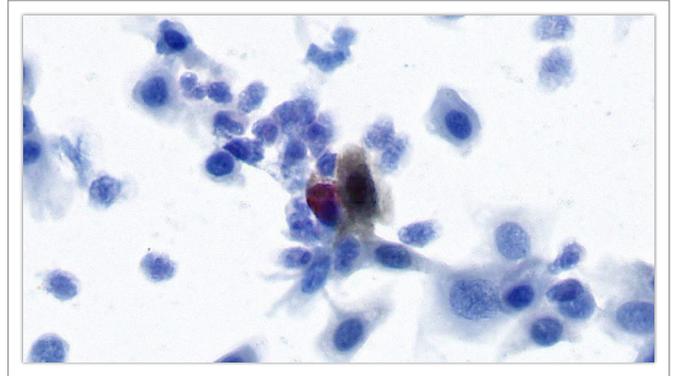

Peripheral blood

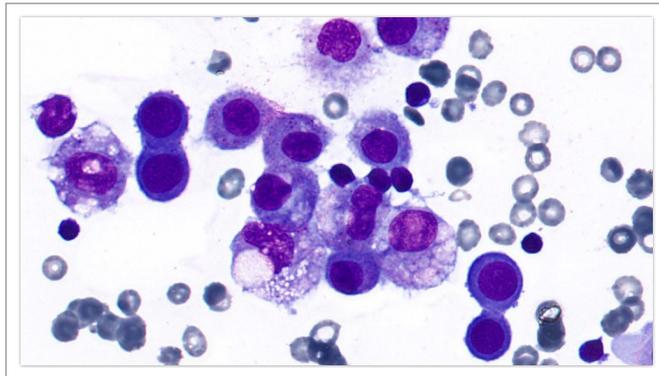

Bone marrow

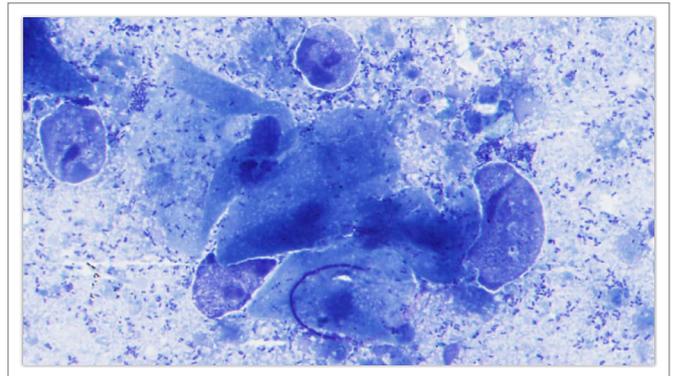

Cervical cytology

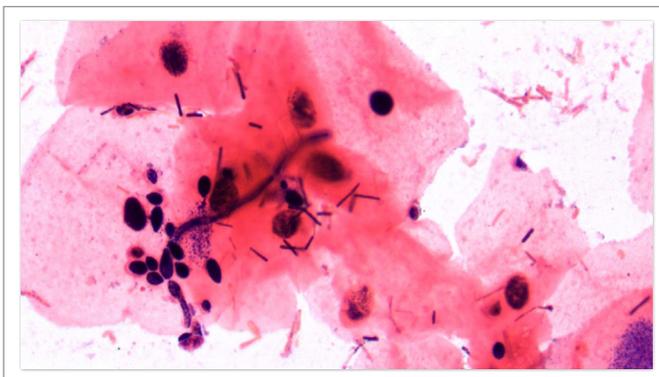

Immunocytochemistry

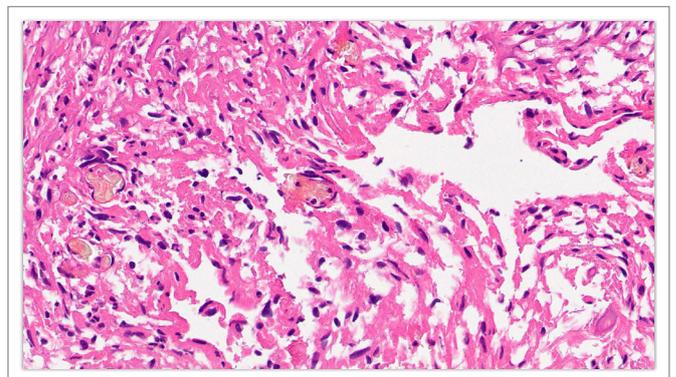

Body Fluids

STD (Sexually Transmitted Diseases)

Microbiology

Histopathology
