

Bone Marrow

Automatic Analysis of Bone Marrow cells

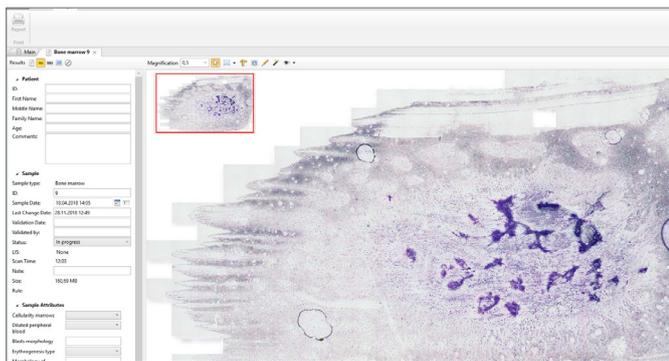

Clinical Application Module

Vision Bone Marrow

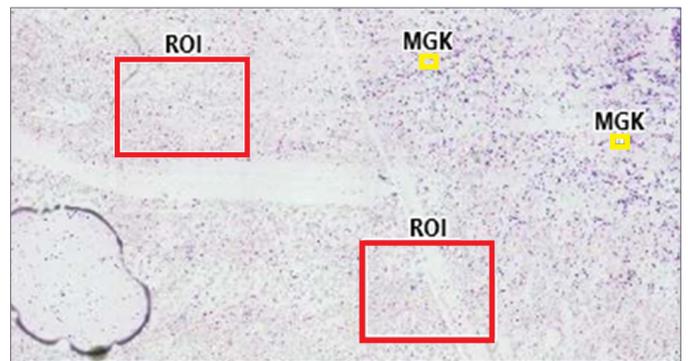

Automatic scanning, pre-classification and counting of bone marrow cells

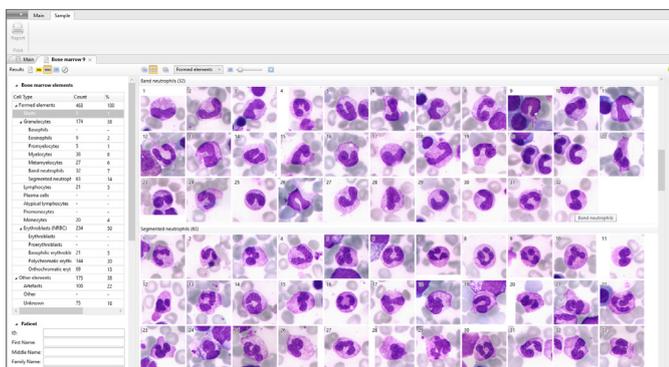

- Blasts
- Basophils
- Eosinophils
- Promyelocytes
- Myelocytes
- Metamyelocytes
- Band neutrophils
- Segmented neutrophils
- Lymphocytes
- Erythroblasts

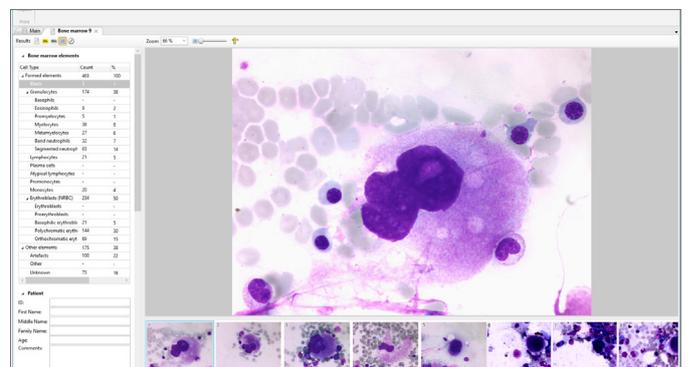

Digital slide of bone marrow.

Automatic selection of regions of interest (ROI) and identification of megakaryocytes (MGK).

Bone marrow cells gallery.

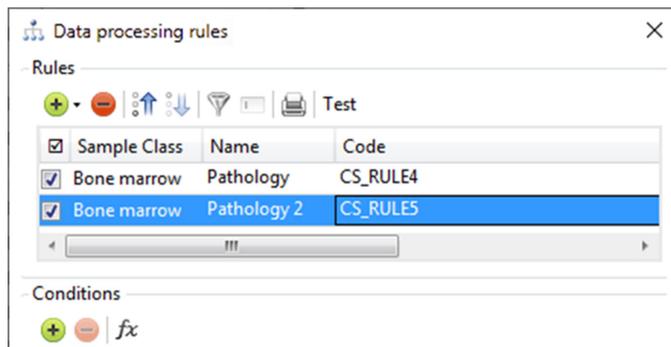

Megakaryocytes gallery.

Automation through Vision Bone Marrow improves the quality and increases the speed of analysis. Vision Bone Marrow allows you to save time and resources of your laboratory. A specialist only validates the analysis results.

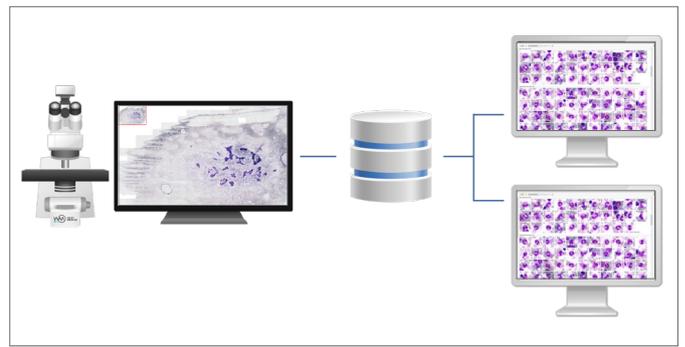

Administrative Modules

Vision Manager

Analysis procedure automation, data processing rules.

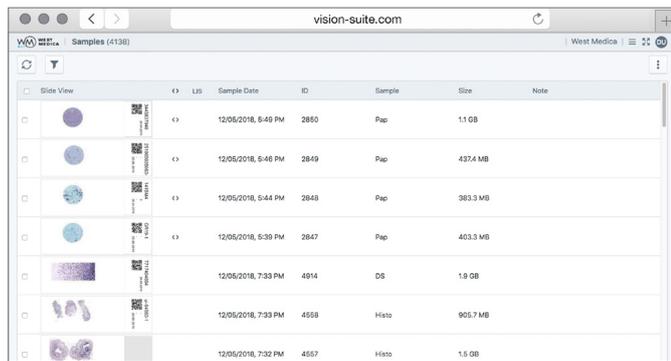

Vision Remote

Remote workstation.

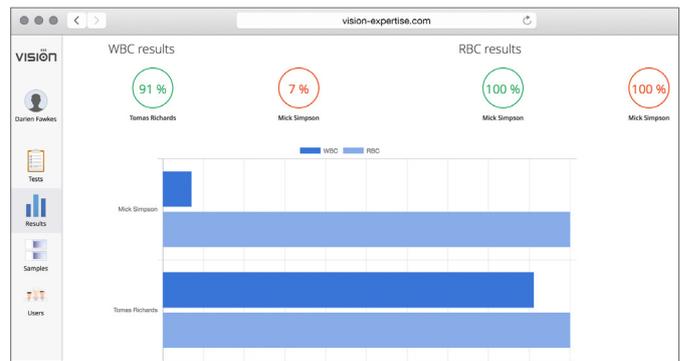

Consulting and Education Modules

Vision Suite

Cloud/server for telemedicine and remote consultations with colleagues.

Vision Expertise

Online testing and quality control.

Artificial intelligence

Artificial intelligence (AI) cumulates algorithms and technologies that allow computers to learn and solve intellectual tasks provided by humans.

AI speeds up processing and interpretation of data, and allows to efficiently perform the most comprehensive tasks, including medical image analysis.

The latest developments of artificial intelligence provide a solution for the tasks connected with automation in digital microscopy.

Our technologies speed up the diagnostic process, reduce analysis time and lower subjectivity of the results received.

They improve the efficiency of laboratory routine operation, bringing microscopy analyses in line with state-of-the-art standards.

Specifications

Vision Assist
Cell Imaging Analyzer

Vision Pro
Cell Imaging Analyzer

Vision Ultimate
Cell Imaging Analyzer
