Application modules

Vision Album

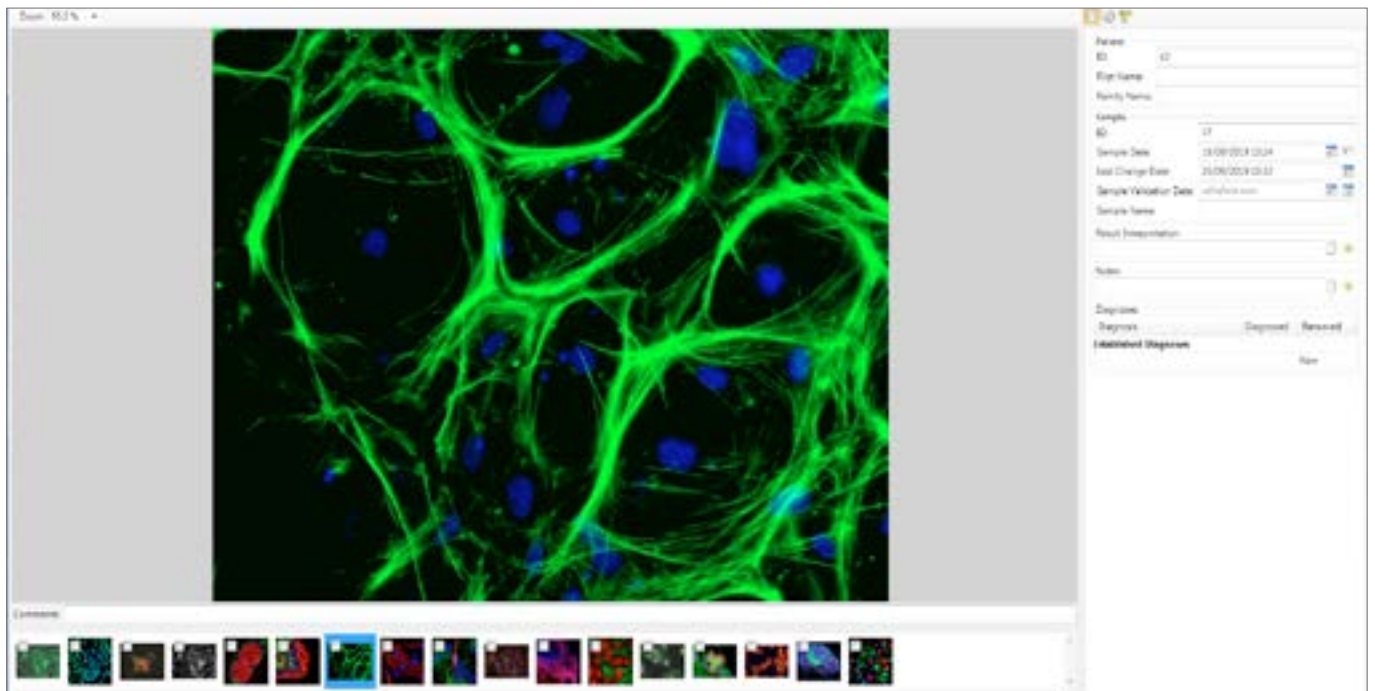

Digital system for visualization and data management. Digital sample management.

Vision Bio

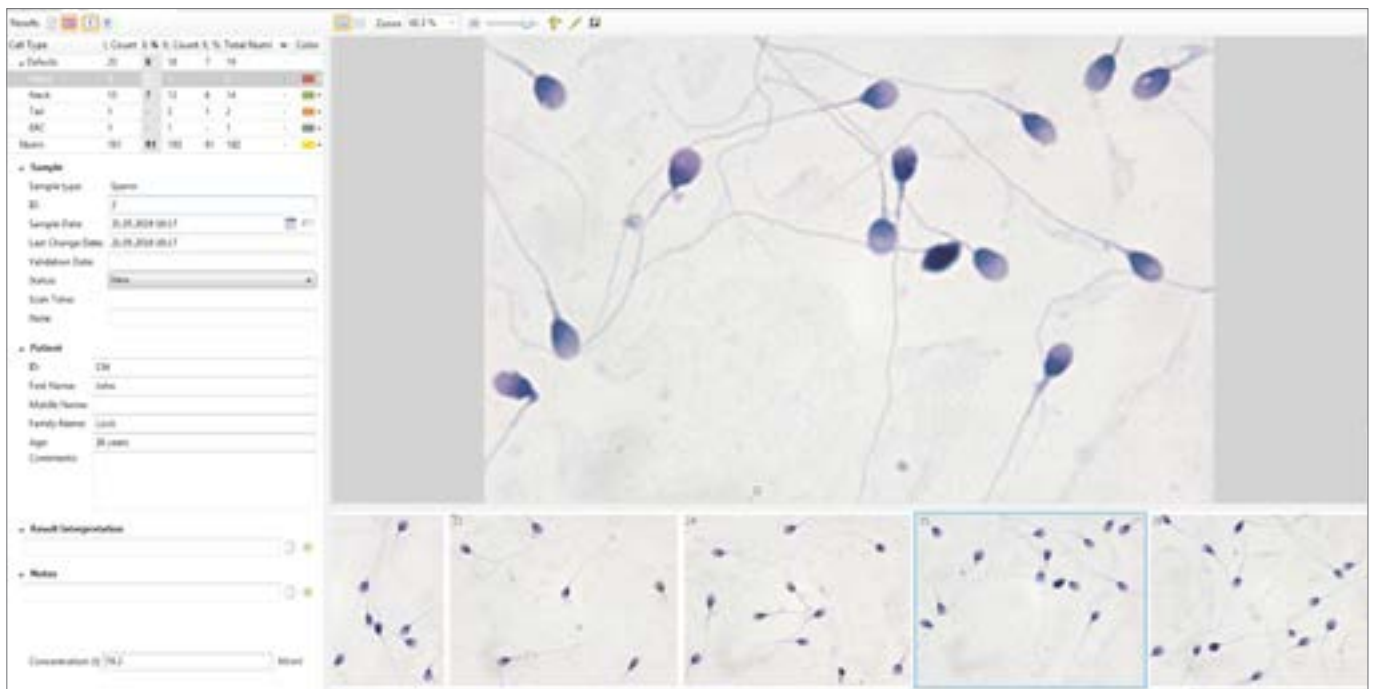

Digital system for analysis automation in biology and medicine. Measurements of linear and optical parameters for particles.

Vision Bio Epi

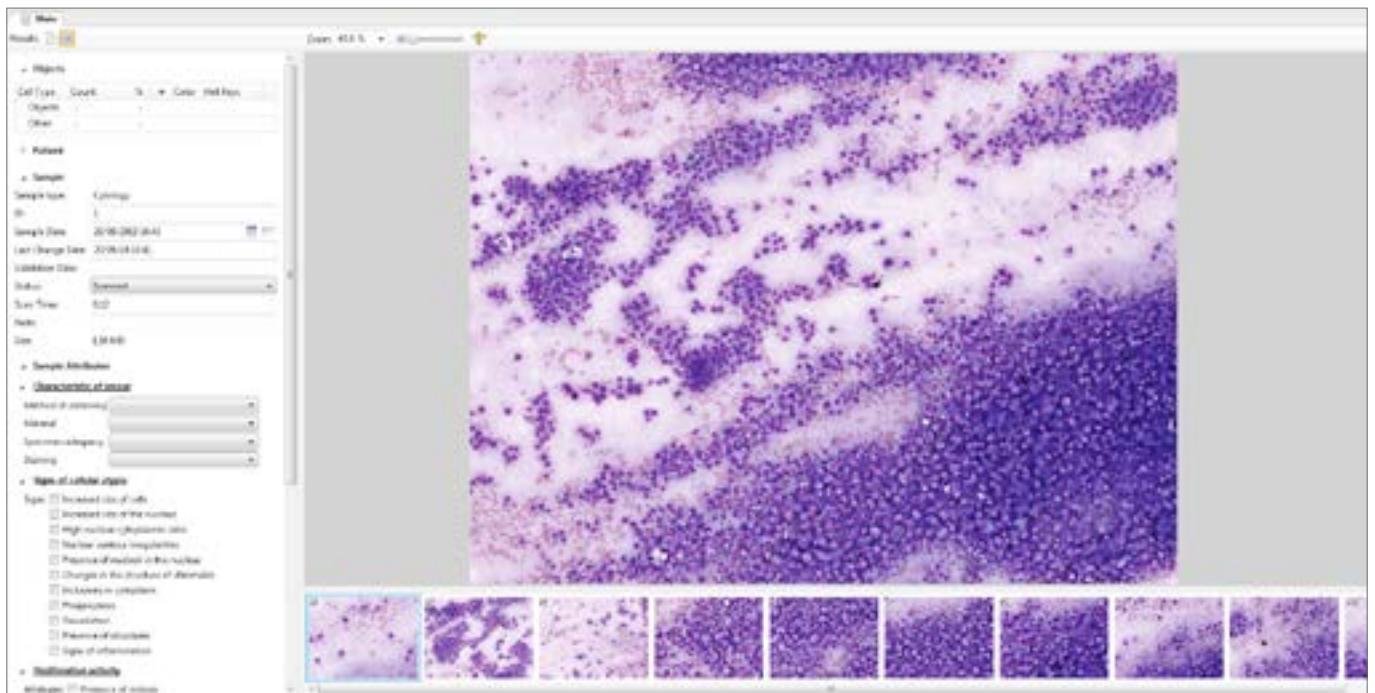

Analysis, report generation and management of digital samples in fluorescence microscopy. Quantitative analysis of different cytochemical and fluorescence staining techniques.

Vision Sperm

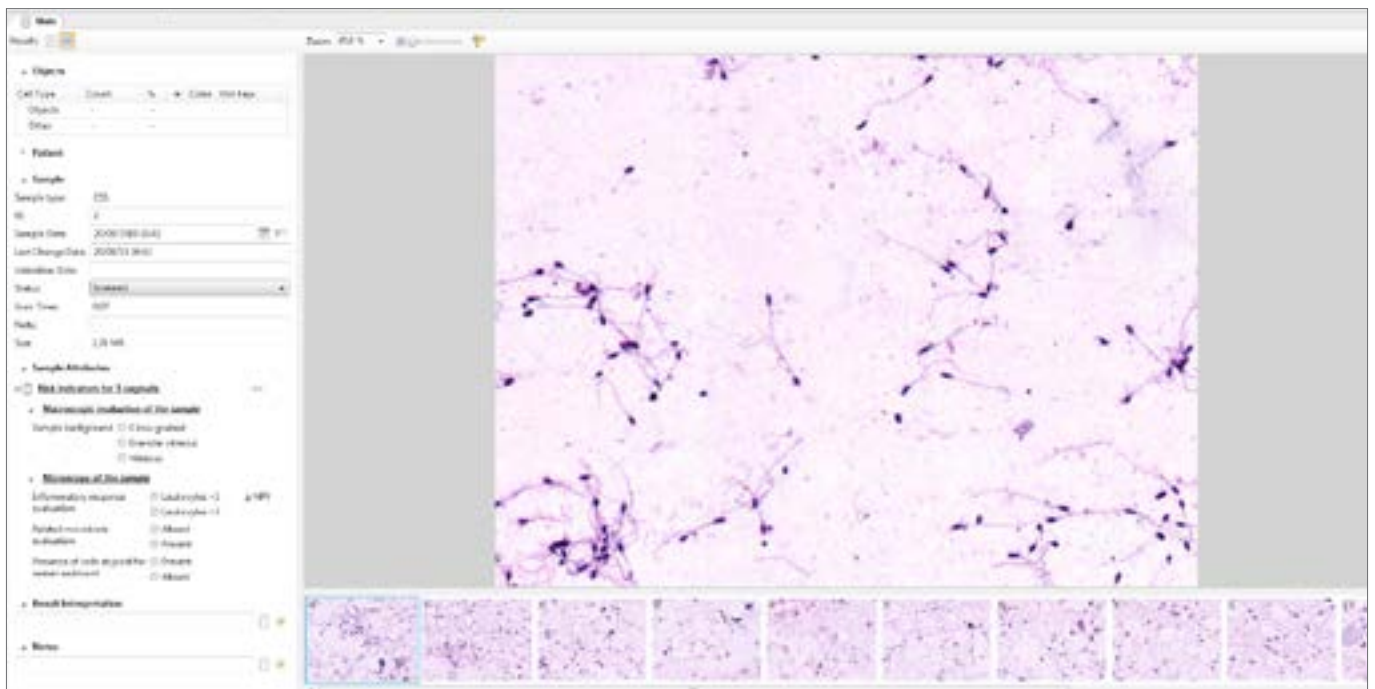

Analysis, report generation and management of digital samples in sperm analysis.

Vision Cyto

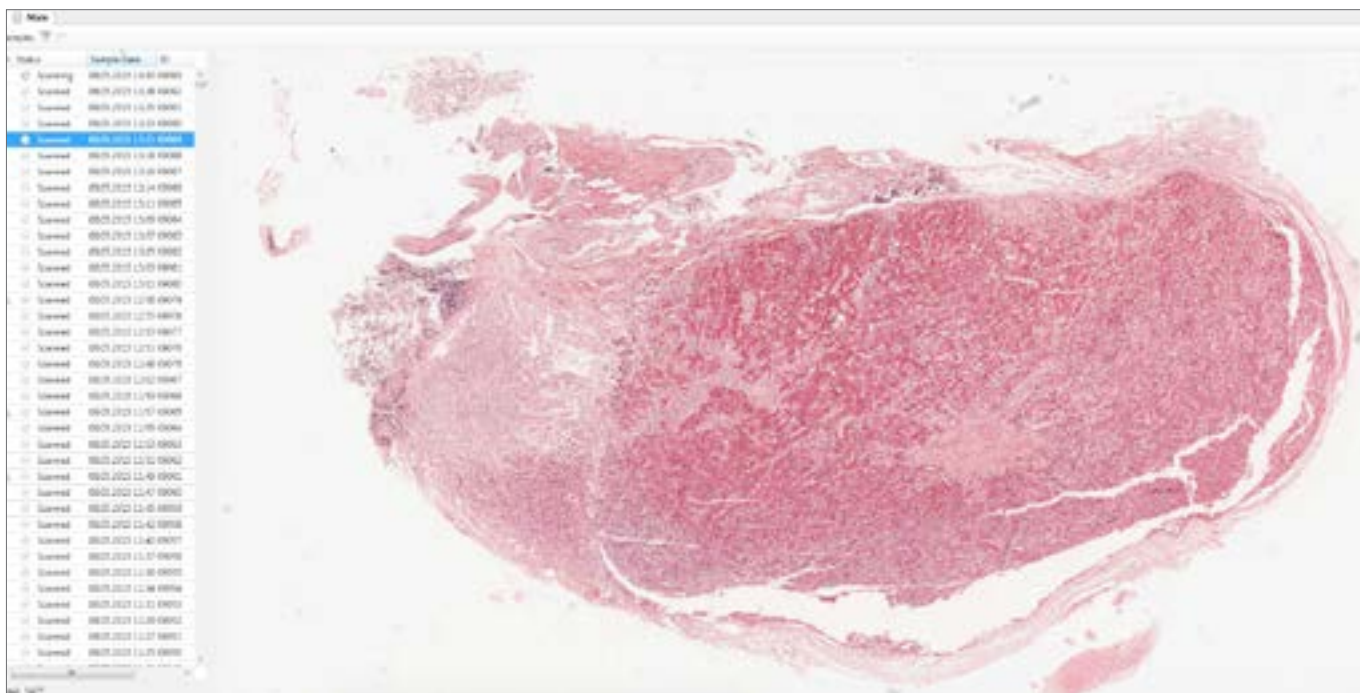

Analysis, report generation and management of virtual samples in cytology.

Vision Cyto Sperm Sediment

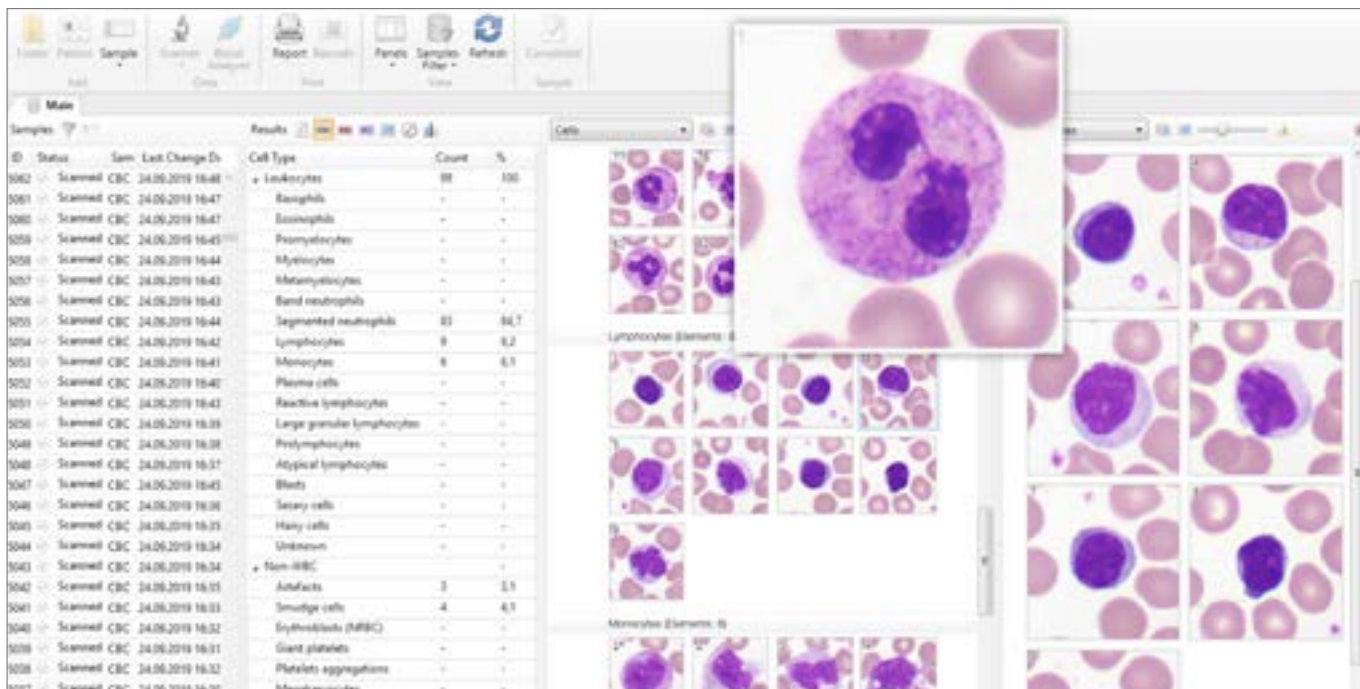

Digital cytology slide of sperm sediment. Testing for latent trichomoniasis, fungal, HPV infections, disbiosis and etc.

Vision Slide

Digital scanning and whole slide imaging. Automatic or manual identification of objects on the digital slide, measurements, objects classification.

Vision Hema

Identification and pre-classification of leukocytes, analysis of erythrocytes and platelets, analysis of pathological and complex cells, blood smear tail.

Administrative module
Vision Remote

Remote workstation.
